Japan

Introduction to Japan

Japan is a powerful and wealthy country in Asia. It is made up of four major islands and several small islands. The capital of Japan is Tokyo. Over 127 million people live in Japan, making it one of the most densely populated countries in the world. To the Japanese, Japan is called Nippon, meaning source of the sun. It is also known as the land of the rising sun. Japan's national flag is a simple red circle on a white background. The red circle represents the rising sun.

Japan’s history began around 300 B.C. It wasn’t until 645 A.D., however, that Japan’s first government was formed. A man named Kotoku proclaimed himself Japan’s first emperor. In 794, Kyoto became the capital city of Japan. For centuries, Japan was closed off from the rest of the world. The island nation kept to itself, except for when it waged war on the neighboring countries of Korea and China. Japan refused to trade with foreign countries, especially western countries. In 1853, a man named Matthew Perry traveled to Japan from America. His goal was to encourage Japan to open up its ports to the world and begin trading. Perry was successful. Japan became a powerful member of the world’s trading community.

The land in Japan is hilly and beautiful. Most people live in and around the coastal cities. But nature hasn’t always been kind. Two major natural forces have plagued the Japanese people for its entire history: earthquakes and tsunamis. Small earthquakes occur in Japan on a daily basis. Every few years, a major earthquake strikes causing thousands of deaths and unbelievable destruction. A tsunami is a huge ocean wave brought on by earthquakes. Some waves have been so large they have wiped out entire Japanese cities.

Japan is a nation jam-packed with art, culture, and industry. Japanese cuisine is popular throughout the world. Japanese architecture and art can be found in homes in Asia, Europe and North America. Many home electronics and cars are made in Japan. Toyota, Nissan and Honda are all Japanese brands.

These days, Japanese cartoons are all the rage. Although Japan may be a world away, its influence can be felt everywhere, even where you live!
